# CS315 LAB INFORMATION

Come to CL135 for labs or lab help.
If you need CS315 lab help outside your scheduled lab time:
- see Nova Scheidt during office hours in CL119 (or in the lab on off weeks)
- email your lab instructor via UR Courses email - no direct messages!

## LAB RELATED INFORMATION:

1. Lab is complementary to the classroom teaching. Lab emphasizes on practical hands-on experience.

2. Lab material is online: CS315 Lab Material. Archival videos from the pandemic (Winter 2021) are also available. Please be familiar with the corresponding lab material before coming to the lab.

3. I will be present in the lab during your regular lab time every week to answer lab related questions.

4. About marking:
   - Lab work is due in UR Courses and at your lab workstation before the beginning of
   - your next lab seminar.
   - Marking will only be done during the lab time.  I will ask you questions about your code. Your answers during the lab time will determine your mark.
   - If you submit in URCourses, but do not attend the lab, your work will not be evaluated.
   - Late work will be evaluated at a 50% penalty during office hours

5. If you cannot turn in lab work or attend section due to illness, interviews, funerals, etc. let your lab instructor know prior to (or the day of) the lab. Arrangements can be made.

## LAB WEIGHTS:

- The lab makes up 10% of your CS315 grade
- 2% is for punctual attendance
- 8% is for answering questions about the code acquired and modified in the lab

We encourage group interactions but expect that your work will be your own. Success in the lab will help you meet Dr. Hepting's programming requirements.
